Profile

An data engineer with 2+ years of experience in information technology industry. Passionate about data engineering technologies.

Professional Experience

01/2022 – present
Pune, India

Data Engineer, *Infosys ltd*
Senior System Engineer (Azure Data Engineering)
FMCG Client Retail Intelligence
- Developed a working model for retail alerting process. We use Azure Data Lake Gen 2, Data factory,Databricks for ETL process. We have developed and implemented working modules to analyze complex data and identified anomalies, trends to provide useful insights to improve OSA (On Shelf Availability) measure. PySpark is used for data flow in SQL tables.
- Developed end to end data pipelines using Azure Data Factory.
- Interact with clients on a regular basis to manage ongoing project deliverables, identify needs and elicit opportunities for additional reporting and build strong relationships to facilitate business growth.
- Also worked in Query optimizing that has reduced then runtime of Query from 3hrs to few minutes and thus saved Databricks credits.
- Experienced in writing SQL and Pyspark code in Azure Databricks.
- Involved in creating tables,joins,subqueries,views for business application development.

06/2021 – 01/2022
Pune, India

Data Engineer, *Infosys ltd*
Syndicated Alerting Directly with Customer FMCG Client
June 2021 – Jan 2021
- Developed a model to send the alert file directly with store operations leader using the azure data factory to check the availability of the product on the shelve and helped to resolve the issue.
- Understand and implemented data cleansing rules to remove bad records.
- As a part of operations team monitored the production pipelines and handled the failures.
- Wrote clean code in SQL And Pyspark and delveloped a business logic in Azure databricks.
